CREATE & TRANSPORT STANDARD TEXT

STEP1: Create Standard Text: T-Code SO10

Enter the Text Name and then click CREATE Push Button. A Text Screen will appear where you can maintain the Text and SAVE.

Standard Text: Request

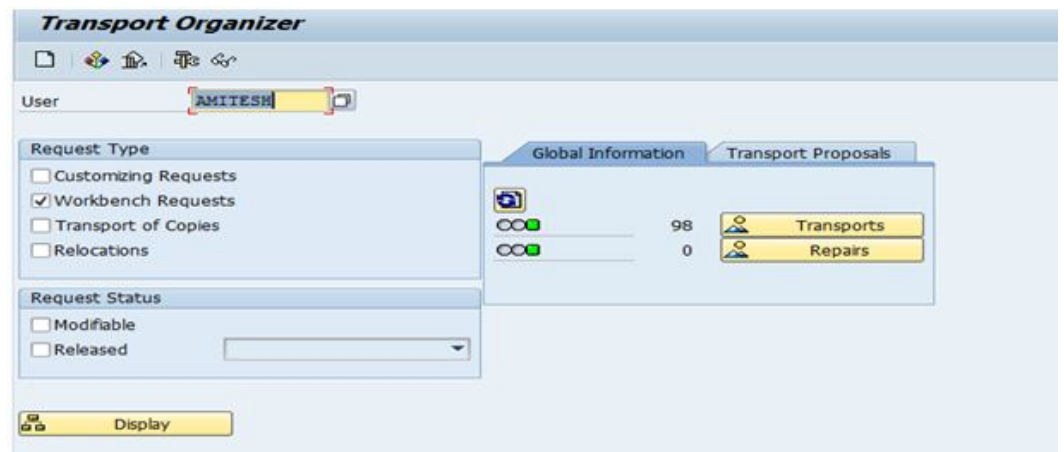

Standard Text

Text Name	Z-IR-CM	
Text ID	ST	Standard text
Language	EN	

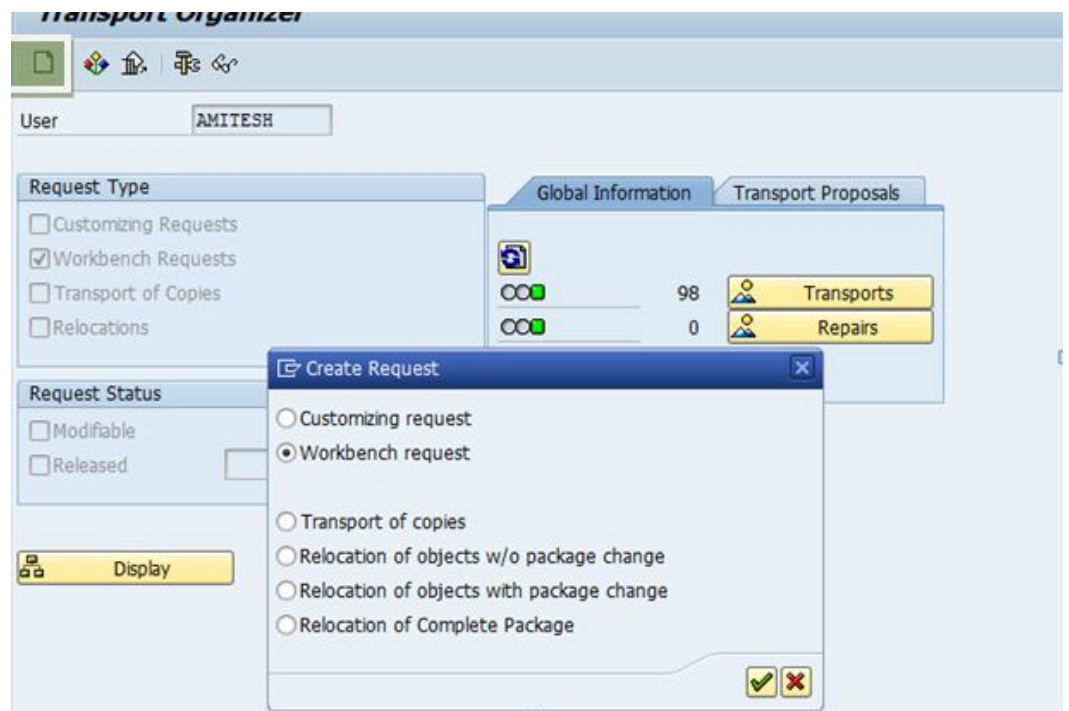

Display Change Create

STEP 2: CREATE TRANSPORT REQUEST FOR TRANSPORTING THE TEXT

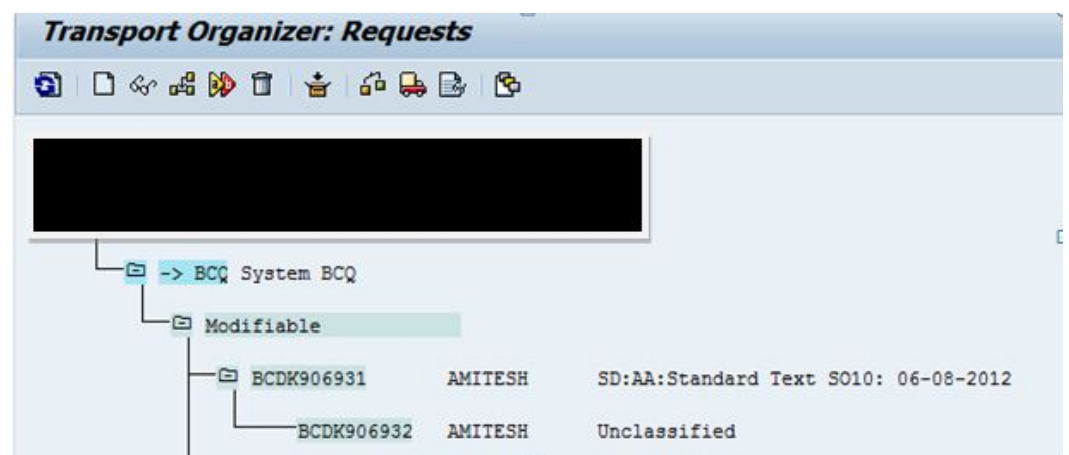

T-Code:- SE09

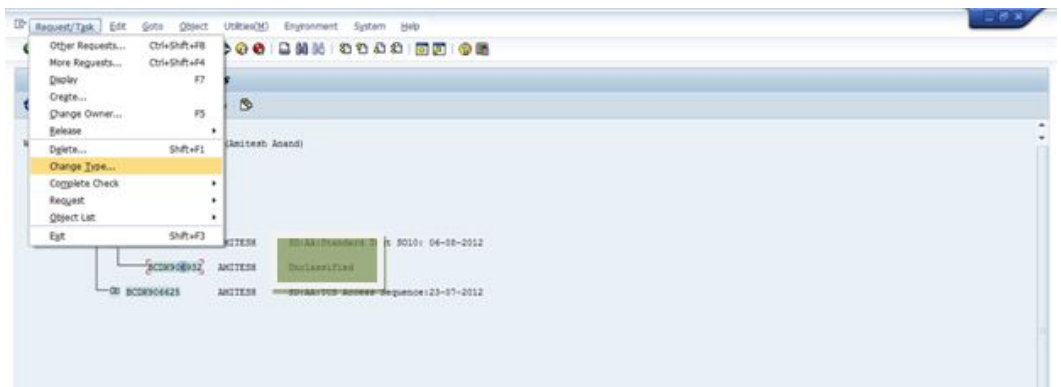

Click on CREATE

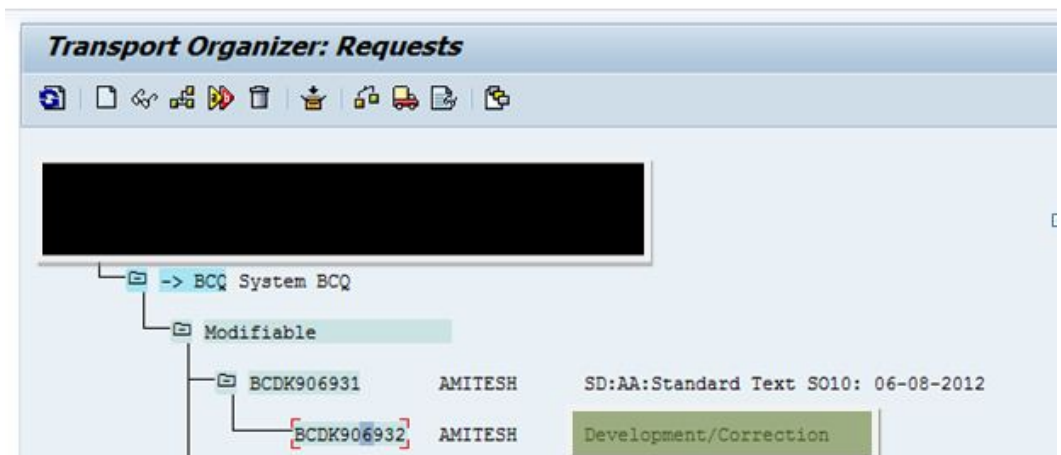

Create a Transport Request

Also need to change the Transport Request from Unclassified to Correction or Repair. For this select your transport request (BCDK906932) and then click on Request/Task on main menu à Change Type and then select the Correction.

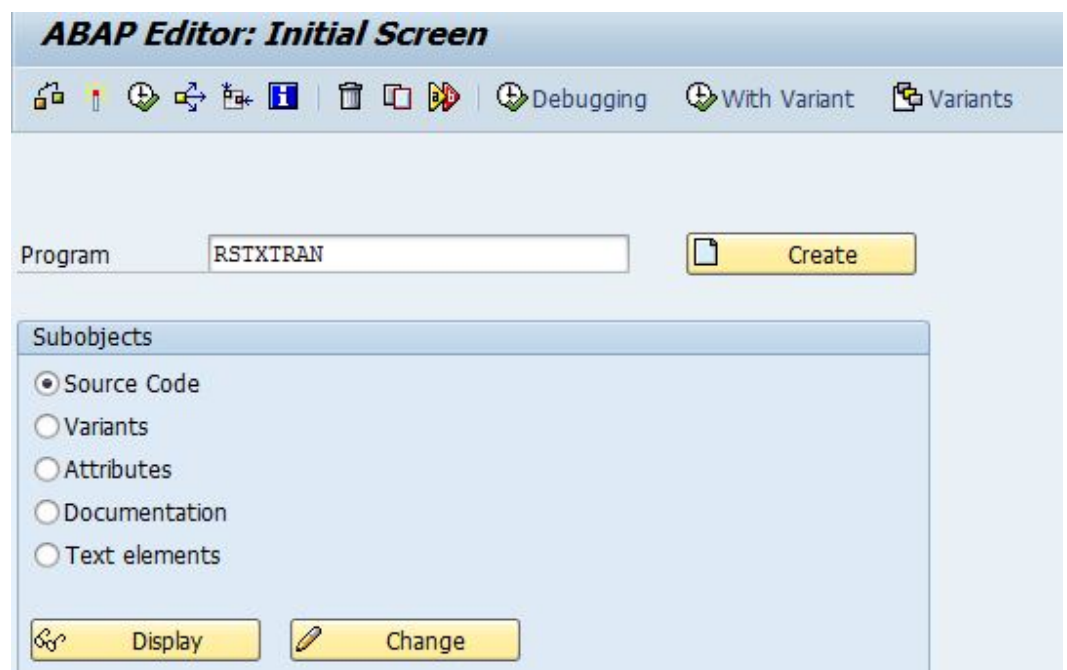

Now you can see that from Unclassified the request type changed to Development/Correction.

STEP 3: Include the Text in Transport Request

T-Code: SE38, run program RSTXTRAN

Following Screen will appear, enter your Transport Request No. (note that the transport request no. of Sub-Object will be entered here and not the Main Object)

Transfer of SAPscript Texts to a Correction

Name of correction	BCDK906932 	
Text key - object	TEXT	
Text key - name		to 
Text key - ID	ST	
Text key - language	EN	

☐ Text Name in Lower Case

Following Screen will appear:
